Sea Grant–NCCOS Northeast Aquaculture Siting and Sustainability Workshop

Portland, Maine
January 6, 2026

As part of a unique collaboration between Sea Grant and the National Centers for Coastal Ocean Science (NCCOS), we are hosting a series of regional workshops to showcase and receive input on a range of tools useful for aquaculture siting and sustainability. We are actively recruiting individuals from the Northeast engaged in aquaculture extension, industry, research, or any other coastal ocean stakeholders who are interested in this topic. Because of space limitations, we will only be inviting about 50 people to attend in person. If you are interested in attending the workshop, please contact Dana Morse at dana.morse@maine.edu at Maine Sea Grant or Annie Schatz at kschatz@mdsg.umd.edu at Maryland Sea Grant.
